

Building scalable web applications with React, AI, and modern frontend technologies.

SYIFA FAUZIYAH ARIZAL

Front-End Engineer | React • Next.js • TypeScript | AI-Powered Web Applications

[+62 858-6486-4931](tel:+62858-6486-4931) · syifaigi@gmail.com · linkedin.com/in/syifaarizal · github.com/syfaarizal · syifaarizal.my.id

PROFESSIONAL SUMMARY

Front-End Engineer with hands-on experience building production-ready web applications, AI-powered products, and workflow automation solutions. Experienced delivering responsive React and Next.js applications, integrating AI APIs, and shipping complete digital products from UI to deployment. Completed a project-based internship, delivered freelance projects for real clients, and continuously build scalable software under the LIBR personal brand.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript

Frontend: React, Next.js, Vue, Vite, Tailwind CSS, Framer Motion, GSAP, Zustand, TanStack Query

Backend & DevOps: Node.js, FastAPI, MongoDB, REST API, Vercel Serverless, Docker, Linux VPS, Git / GitHub

AI & Automation: OpenAI API, Claude API, Gemini API, AI API Integration, Prompt Engineering

Specialisations: Responsive Web Dev, Web Applications, Dashboard Apps, Discord Bot Dev, Full-Stack Dev

EXPERIENCE

Front-End Engineer (Freelance) · Karawang International Hotel School 2026 · Remote

[React](#) · [TypeScript](#) · [Vite](#) · [Tailwind CSS](#) · [Framer Motion](#) · [React Router](#) · [Node.js](#) · [Nodemailer](#) · [Vercel](#)

- Designed a full marketing website from concept to launch in 5 days, effectively streamlining student registration and lead generation processes.
- Delivered a responsive multi-page marketing website that centralized registration and automated email workflows, reducing manual administrative tasks.
- Built a secure multi-step registration form with server-side validation and Vercel Functions, enabling automated transactional email workflows.

Project-Based Virtual Intern — Front-End · Core Initiative Studio Jul – Aug 2026 · Remote

[Vue.js](#) · [Vanilla CSS](#) · [Fake Store API](#) · [Git](#) · [Docker](#) · [CI/CD](#)

- Engineered a responsive e-commerce catalog using Vue.js 2 and reusable components, improving code maintainability and modularity.
- Deployed a production-ready application by leveraging Git, Docker, and CI/CD workflows, ensuring reliable and automated release cycles.
- Collaborated within a professional CI/CD-driven environment, utilizing Git and Docker to streamline development and deliver a production-ready application.

Tech Content Creator (VTuber) · Kai Shi (@kaishiscd) 2025 – Present · Online

- Designed educational programming content focused on modern web development and AI tools, effectively guiding beginner developers through complex technical concepts.
- Automated the entire content production pipeline, optimizing planning, recording, and publishing workflows to maintain consistent delivery schedules.

SELECTED PROJECTS

Shopi — Full-Stack E-Commerce Application · 2025

[React](#) · [TypeScript](#) · [Tailwind CSS](#) · [Zustand](#) · [TanStack Query](#) · [FastAPI](#) · [MongoDB](#) · [JWT](#)

- Engineered a scalable full-stack marketplace featuring JWT authentication, role-based authorization, and efficient server-state management, resulting in a secure platform with real-time admin insights.

Kichi (Pirate Helper) — AI-Powered Discord Bot · 2025

[Node.js](#) · [Discord.js](#) · [OpenRouter](#) · [Piper TTS](#) · [Linux VPS](#) · [PM2](#)

- Architected a personalized Gen Z AI companion featuring per-user memory and offline Indonesian TTS, deployed on a Linux VPS with PM2 to guarantee persistent uptime and automated process management.

LIBR — Personal Portfolio · 2025 – Present

[React](#) · [TypeScript](#) · [Tailwind CSS](#) · [Framer Motion](#) · [Vite](#) · [Vercel](#)

- Delivered a high-performance personal portfolio website, leveraging modern React stacks to create a responsive portfolio platform showcasing projects, technical skills, and personal brand.

Aegis — Security & Moderation Discord Bot · 2026

[Node.js](#) · [Discord.js](#)

- Optimized moderation capabilities by implementing custom spam detection and bulk message management, effectively enhancing server safety and streamlining administrative oversight.

CERTIFICATIONS

- **AI Productivity and AI API Integration for Developers** — Hactiv8 Indonesia Jul 2026
- **Project-Based Internship Certificate of Achievement** — Core Initiative Studio Aug 2026
- **Fundamental Front-End Web Development I & II** — Coding Studio 2025
- **Responsive Web Design** — freeCodeCamp 2025

EDUCATION

Bachelor of Informatics Engineering (S1) · Universitas Siber Muhammadiyah 2024 – Present

GPA 3.88 / 4.00 · Coursework: Web Programming, Software Engineering, UI/UX Design, Data Structures

LANGUAGES

Indonesian — Native · English — Professional Working Proficiency
