SUMMARY

Front-End Developer and UI Designer with 1–2 years of hands-on experience building responsive, user-centric web applications. Proficient in React, Next.js, Vue, TypeScript, and Tailwind CSS. Passionate about clean UI, smooth user experiences, and shipping products that work beautifully across all devices. Currently pursuing a Bachelor's degree in Informatics Engineering while actively developing real-world projects under the LIBR personal brand.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React 18, Next.js, Vue 3, Nuxt, Tailwind CSS, GSAP, Lucide React, Discord.js v14

Tools & Platforms: VS Code, Cursor, Vite, Node.js, Git, GitHub, Vercel, VPS (Linux), Notion, CapCut

Design Tools: Canva, Nano Banana

AI Tools: OpenAI API (integration), ChatGPT, Claude, Gemini, Grok — applied for development assistance, research, scheduling, and content ideation

Focus Areas: Responsive UI, Landing Pages, Web Apps, Dashboard, UI/UX Design, Bot Development, AI Integration

PROJECTS

Bisik-Bisik — Anonymous Chat Application

2025

React · Tailwind CSS · GSAP · REST API

- Built a real-time anonymous chat app with privacy-first architecture and dynamic UI animations powered by GSAP.
- Integrated REST API for live messaging and implemented smooth page transitions for a native-app feel.

ProDraw — Advanced Web Drawing Application

2025

React 18 · Tailwind CSS · Vite · Lucide React · API

- Developed a feature-rich browser-based drawing tool with a canvas rendering engine and a modular toolbar UI.
- Utilized Vite for fast build performance and integrated external API for extended drawing capabilities.

FocusFlow Pomodoro Timer — LIBR

2025

React · Tailwind CSS

- Designed and built a productivity timer app under the LIBR brand with a clean, distraction-free interface.
- Implemented session tracking, customizable intervals, and notification support entirely on the front end.

Kichi — AI Discord Bot

2026

Node.js · Discord.js v14 · VPS Deployment

- Built a multi-feature AI-powered Discord bot deployed to a Linux VPS with persistent uptime, integrating OpenAI API for natural language responses.
- Features include conversational AI (/ask-ai), per-user session memory, automated server reminders with custom scheduling, anti-spam cooldown, lyric generation, and voice channel support.

Aegis — Security Discord Bot

2026

Node.js · Discord.js

- Developed a moderation and security bot for Discord servers, focused on automated threat detection and server management.

CruisePoint Indonesia — Responsive Landing Page

2025

HTML5 · CSS3 · JavaScript

- Built a fully responsive landing page with a focus on modern design, accessibility standards, and fast load performance.
- Implemented semantic HTML5 structure and CSS animations to enhance visual engagement.

Login Page Showcase — LIBR Brand

2025

HTML · CSS · JavaScript → migrated to React · TypeScript · Tailwind CSS

- Designed and iterated a branded login page UI, initially in vanilla web tech before migrating to a React + TypeScript stack as the LIBR brand matured.

Personal Portfolio — Syifa Fauziyah Arizal (LIBR)

2025 – Present

TypeScript · CSS · Vercel

- Designed and built a personal portfolio website under the LIBR brand, deployed to Vercel.
- Showcases projects, skills, and UI design sensibility with a focus on performance and clean aesthetics.

TECHNICAL CONTENT CREATION

Kai Shi — Tech Educator (@kaishiscd)

2025 – Present

TikTok · YouTube · Instagram · VTuber-style (voice-over + anime avatar, no face reveal)

- Produce mini-bootcamp style educational content covering HTML, CSS, JavaScript, Git & GitHub, and modern front-end frameworks — aimed at beginners entering the tech industry.
- Create content on AI tools and developer mindset with a storytelling-first approach, building an audience across three platforms under the alias Kai Shi.
- Manage full content pipeline independently: planning, scripting, recording, and video editing using CapCut.
