

SYIFA FAUZIYAH ARIZAL

Front-End Developer | UI Designer | React & Next.js Developer | Workflow Automation

+62 858-6486-4931 | syifairqi@gmail.com | [linkedin.com/in/syifaarizal](https://www.linkedin.com/in/syifaarizal) | github.com/syfaarizal | syifaarizal.my.id

PROFESSIONAL SUMMARY

Front-End Developer and UI Designer with hands-on experience building responsive, user-centered web applications and digital products. Skilled in React, Next.js, TypeScript, Tailwind CSS, and modern front-end development practices. Experienced in developing AI-powered applications, full-stack e-commerce platforms, Discord bots, and scalable web interfaces. Active as a freelance web developer, delivering complete website solutions for Indonesian UMKM clients within tight timelines. Passionate about creating clean user experiences, writing maintainable code, and transforming ideas into functional digital products. Currently pursuing a Bachelor's Degree in Informatics Engineering while actively building real-world projects under the LIBR personal brand.

TECHNICAL SKILLS

Programming Languages	Front-End Development	Backend & Dev Tools	Areas of Expertise
• HTML5 • CSS3 • JavaScript (ES6+) • TypeScript	• React 18 • Next.js • Vue 3 / Nuxt • Tailwind CSS • Framer Motion • GSAP • Zustand • TanStack Query	• Node.js • FastAPI • MongoDB • Discord.js v14 • REST API • Nodemailer • Vercel Serverless • Git / GitHub • Vercel • Linux VPS	• Responsive Web Dev • Landing Page Dev • Dashboard Applications • UI/UX Design • AI Integration • Discord Bot Dev • Freelance Web Dev • Full-Stack Development
AI & Automation			
• OpenAI API Integration • Claude API • Gemini API • AI-Powered App Dev			

FREELANCE WORK EXPERIENCE

Front-End Developer (Freelance) | Karawang International Hotel School | 2026

React 18 | TypeScript | Vite | Tailwind CSS | Framer Motion | React Router v6 | Node.js | Nodemailer | Vercel

- Designed and developed a full marketing website for a hospitality education institution — from initial brief to live deployment within 5 days.
- Built an animation-rich, responsive UI with Framer Motion: hero section, statistics, program pages, alumni, testimonials, gallery with lightbox, FAQ, and multi-page routing via React Router v6.
- Implemented a multi-step student registration form with KTP & photo file upload, file-size validation, and dual Nodemailer email notifications (admin + applicant confirmation).
- Built a brochure download lead-capture flow that sends admission inquiry emails and triggers instant PDF delivery.
- Architected backend as Vercel Serverless Functions (stateless, no traditional server required), with CORS protection and a `/api/health` diagnostic endpoint.
- Deployed to Vercel with SPA routing, environment-based configuration, and branded HTML email templates for all transactional emails.

PROJECT EXPERIENCE

Shopi – Full-Stack E-Commerce Application | 2025

React | JavaScript | Tailwind CSS | Zustand | TanStack Query | FastAPI | MongoDB | JWT

- Built a full-stack marketplace application with a red & white premium theme, covering 10+ pages: Login, Home, Search & Filters, Product Detail, Wishlist, Cart, Checkout, Order, Profile, and Admin Dashboard.
- Implemented role-based access control (user/admin) with JWT authentication; admin routes are fully protected and separate from the public storefront.
- Developed a full Admin Dashboard with live stats, revenue charts, and CRUD tables for products, orders, and users.
- Built a drag-and-drop image upload system for product management and a dummy payment page supporting Virtual Account, E-Wallet QR, and credit card (with 15-minute countdown).
- State management via Zustand (auth, cart, wishlist, orders) and TanStack Query for server-state; backend powered by FastAPI + MongoDB (Motor) with a complete REST API.

Kichi (Pirate Helper) – AI-Powered Discord Bot | 2025 – 2026

Node.js | Discord.js v14 | OpenAI API | Piper TTS | Linux VPS | PM2

- Developed a sarcastic Gen Z AI companion bot with persistent VPS deployment, high uptime, and a full slash command system.
- Integrated OpenAI API (via OpenRouter) for conversational AI with per-user memory (up to 20 messages), personalization, and AI intent parsing (e.g. natural-language reminder creation).
- Built a full reminder system: 3 built-in daily reminders + fully customizable per-guild reminders with interactive edit UI (select menu, action buttons, modal form) and cron scheduling.
- Implemented offline TTS in Indonesian via Piper TTS for voice channel support (/join, /leave, /speak), with auto-leave logic and caller permission control.
- Built a multi-provider lyrics system (Genius API metadata → lyrics.ovh → LRCLIB fallback) with 6-hour in-memory caching and anti-spam cooldown.

Kichi – Discord Bot Landing Page | 2026

React | TypeScript | Tailwind CSS | Vite

- Designed and developed a dedicated marketing landing page for the Kichi Discord bot, migrated from plain HTML to a full React + TypeScript component architecture.
- Built canvas-based particle background animation, scroll reveal via IntersectionObserver, and a filterable slash commands section with tab navigation.
- Implemented a mobile-responsive fixed Navbar with hamburger menu, gold shimmer text animation, glassmorphism cards, and a How It Works step flow with connecting lines.
- Added Terms of Service, Privacy Policy, and Report Issue pages with a shared PageLayout wrapper and React Router integration.

Aegis – Security & Moderation Discord Bot | 2026

Node.js | Discord.js v14

- Designed and developed a moderation-focused Discord bot with automated server management and threat detection.
- Implemented spam detection via MD5 hashing, in-memory Map/Set caching, bulk message deletion with rate-limit handling, and native Discord timeout enforcement.

Bisik-Bisik – Anonymous Chat Application | 2025

React | Tailwind CSS | GSAP | REST API

- Built a privacy-focused anonymous chat platform with real-time communication and advanced GSAP UI animations.
- Integrated REST APIs for message handling and designed a seamless, fluid user experience end-to-end.

ProDraw – Advanced Web Drawing Application | 2025

React 18 | Tailwind CSS | Vite | Lucide React

- Developed a browser-based drawing application with modular component architecture and canvas rendering features.
- Integrated external APIs and built a clean, accessible toolbar UI with Lucide React icon system.

Personal Portfolio Website (LIBR) | 2025 – Present

React | TypeScript | Tailwind CSS | Framer Motion | Vite | Vercel

- Designed and developed a cyberpunk-themed personal portfolio with red neon accents, pixel-art UI elements, and a gaming HUD aesthetic.
- Built a Hero section with dual-layer parallax and CSS glitch effects; page-based navigation with Framer Motion transitions and a HUD screen frame.
- Implemented an About section with animated skill bars, a hexagonal SkillTree with SVG connectors, and a Digital Logs gallery with filter tabs and accordion cards.
- Integrated an OpenRouter-powered AI chat modal (SSE streaming) rendered via React createPortal; also built Projects, Skills, Blog, and Contact sections.

CONTENT CREATION EXPERIENCE

Kai Shi – Technology Content Creator | 2025 – Present

TikTok | YouTube | Instagram | VTuber Format

- Produce educational web development content with an anime VTuber avatar format (voice-over, no face reveal) under the alias @kaishiscd.
- Create beginner-friendly tutorials covering HTML, CSS, JavaScript, Git, GitHub, React, and AI tools.
- Manage the complete production pipeline: planning, scripting, recording, editing, and publishing across three platforms.

CERTIFICATIONS

- Fundamental Front-End Web Development — Coding Studio (2025)
- Fundamental Front-End Web Development II — Coding Studio (2025)
- Responsive Web Design — freeCodeCamp (2025)
- Fullstack Web Developer (Beginner) — ITBOX (2024)
- Fullstack Web Developer (Intermediate) — ITBOX (2024)
- Fullstack Web Developer (Advanced) — ITBOX (2024)

EDUCATION

Universitas Siber Muhammadiyah | 2024 – Present

Bachelor of Informatics Engineering (S1) | Current GPA: 3.88 / 4.00

- Relevant Coursework: Web Programming, Software Engineering, UI/UX Design, Data Structures
- Active in personal software development projects and technology content creation

LANGUAGES

- Indonesian — Native
- English — Professional Working Proficiency
